

Green Solution for the Powder Coating Industry

(OGNG.ob)

Integrated Green Technologies

- IGT is an industrial tools, machinery and equipment manufacturer
- Distributor of heavy duty blasting equipment and “green” environmentally safe mobile powder coating systems
- IGT will capitalize in the manufacturing and infrastructure restoration markets utilizing proprietary powders and technologies
- Produce unique powder coatings, blasting materials, tools and services

Company Background

- Originally designed as a specialty marine application
- Shifted to Eco-friendly offsite (mobile) powder coating system
- IGT is the first company to successfully develop mobile powder coating tools and technology
- No oven needed

Why Integrated Green Technologies

- IGT acquired the rights to a patent pending electrostatic powder coating spray gun (Triplex Powder Gun)
- The Triplex Powder Gun allows for commercialized offsite powder coating on large surfaces, such as oil rigs, ship decks and concrete
- IGT has developed patent-pending heat reflective and glow in the dark powder coatings

The Triplex Powder Gun

Electrostatic Thermal Spray, No Oven Needed

- Triplex gun combines electrostatic powder coating with thermal spray technology permitting both powder coating and curing with one hand-held automatic tool
- Production rates - one man, one gun, up to 3000 sq ft per day
- Powder coats in factory setting for limited production runs, special colors, special functional coating. No oven required.
- Completely eliminates Faraday Cage issues

Electrostatic Thermal Spray (cont.)

- Powder coat parts too big for existing ovens right in your plant
 - No truck loading and transportation costs
 - Eliminate expensive large part coating job shops
- Powder coats in the field
 - Special powders are fully field repairable - your imagination is the limit
- Powder coat multiple surfaces
 - Aluminum, metal, plastic, fiberglass, glass and wood

IGT Products

IGT Custom Products

- Triplex Powder Gun
- Blasting equipment
- Environmentally safe blasting materials

Powder Coatings Available

- Retro reflective coatings
- Anti corrosion coatings
- Pipe coatings
- Bridge coatings
- Light pole coatings
- Anti slip coatings
- Swimming pool liner coatings
- Anti-foul marine coatings
- Anti microbial coatings

Costs and Performance

Application Costs

- The IGT system cost a fraction of the price of traditional powder coating equipment
- Powder Coating costs per square foot are relative to traditional solvent based paints but last for 15 years without fading or degradation

Performance

- 4 Mil of thickness will completely seal the substrate and protect and prolong the life of the product while maintaining a vibrant color for years.
- Stops the growth of rust and corrosion

IGT in Action

Marine Environment Test

(3 month test)

Metal plate with no coating

Metal plate with patented anti-foul coating

IGT Markets

- Billion dollar worldwide market
- Growth rates exceed the liquid coatings market (paint)
- 4.5 - 5.1 % on a per pound growth basis
- Chinese markets are estimated to grow at 12% year-over-year

Distribution Channels

Distribution networks will include:

- Carlton Pools (50 dealers nationwide)
- Stoney Brook Manufacturing
- DuPont
- Valspar
- Nordson
- Exclusive distribution agreements
- Direct sales

Competition

Due to the nature of our patent there are no other companies with our technology or capabilities.

IGT Goes Public

On August 17, 2011, IGT through an exchange of stock became a whole-owned subsidiary of Organa Gardens International, Inc. becoming a publicly traded company under the symbol: **OGNG.ob**

Management and Advisory Board

Management

- **Joseph A. Moretti**
CEO
- **Jaclyn Cruz**
President
- **Sharon Deutsch**
Secretary, Treasure and CFO

Advisory Board

- **Bill Garmon**
Polymer Chemist
- **Tommy Hilfiger**
Entrepreneur
- **Joseph Tramuta**
Attorney
- **Joseph Solana**
President of Carlton Pools
- **Fred Florio**
SUBWAY Corp.
- **Raymond Figouroa**
Int'l. Botanical Technologies
